Advanced**Telemedicine**

Attract & engage patients with virtual healthcare, especially in rural areas with our simple & integrated telehealth technology.

Convenient

Expand your availability & reach. You can easily treat rural patients, offer specialty services & avoid unnecessary travel for both parties.

Visual

Compared to a phone consultation, our video conferencing technology creates a highly personal & collaborative patient experience while allowing you to care for more patients without added overhead.

Productive

Virtual home visits provide faster time to care, faster time to diagnosis & treatment, improving health outcomes with less costly treatments.

CARE WITHOUT BOUNDARIES

AdvancedTelemedicine gives clinicians the ability to easily connect to patients regardless of geography, providing uniform, quality patient care & safety. Our remote healthcare technology securely connects you to patients through a growing variety of applications & services including two-way video, secure electronic communications & smartphone.

We make it easy to perform patient consultations via video conferencing, securely transmit still images, communicate via our patient portal & remotely monitor vital signs.

See how easily you can care without boundaries

Telemedicine appointment dashboard.

You enjoy a single location to review the status of all your telemedicine appointments. One-click to launch & end sessions. Messaging patients is immediate via chat.
