

The decision to outsource your financial livelihood is significant. There are many considerations when selecting a medical billing service partner. A certified medical billing company provides best-practices in revenue cycle management and consulting services. Powered by AdvancedMD software, our partner is well equipped to provide exceptional support on our leading cloud scheduling and integrated EHR technologies.

POWERED BY ADVANCEDMD®

You receive appointment scheduling, patient demographics, financial reporting and analysis—as well as our optional full-featured, integrated electronic health record (EHR). You'll say goodbye to software licenses, servers, and upgrades—and hello to a reliable, advanced system, available 24/7, designed for today's modern practice.

PRACTICE MANAGEMENT FEATURES

- **Online Scheduling.** Intuitive & powerfully integrated with seamless end-to-end appointment workflow
- **Electronic Insurance Verification.** Verify coverage prior to the appointment
- **Credit Card Processing.** Automated & simplified with enhanced security
- **Capture Co-pay.** Deductibles & co-pays are easily captured
- **Past-due Alerts.** Front office staff can receive notification & collect at check-in
- **Automatic Charge Capture.** Effortless within the EHR, flexible within practice management
- **5010 Compliant.** Easily comply with health care transactions, code sets & identifiers

INTEGRATED EHR FOR PRACTICE OPTIMIZATION

There is no ROI on EHR utilization unless it's integrated with the practice management system. The AdvancedMD cloud EHR and practice management software suite has been developed from the ground up as an integrated solution to ensure your clinical and business functions work in unison. This enables the most seamless user experience and best possible coordination of data exchange between scheduling, charting and financial reporting applications.

EHR FEATURES [OPTIONAL SERVICE]

- **Patient Encounter.** Productive time spent with patients, effective coding & billing
- **HealthWatcher.** Comply with best practices & ensure patients adhere to medical advice via automated alerts
- **Physician Dashboard.** Personnel and facility scheduling, test results, correspondence alerts & access to charts
- **Customizable Charting.** Customizable templates created & used by physicians in your specialty
- **Template Library.** Browse, review, and import visit notes & subnotes
- **ePrescribing.** A paperless process for patient medication management
- **Test Results & Orders.** View new results & incorporate details automatically & electronically into the patient chart
- **Patient Population Reporting.** Capture & store discrete patient data from notes, verify patient reporting criteria
- **Interoperability.** Communicate with patients & referring physicians, receive results with audit tracking
- **Patient Portal.** An effective & secure cloud patient communication system
- **Quality Reporting.** Capture quality data during routine visit documentation
- **Document & Image Management.** Easily manage documents, images, audio & video files
- **Mobile Access.** Freedom & flexibility to securely access vital patient information & make medical decisions
- **E&M Coding.** Reduce under coding, improve accuracy, increase reimbursements & eliminate manual charge entry
- **Single Sign-on.** Manage patients & easily navigate between systems
- **Unified Messaging.** Eliminate sticky notes, phone tag & yelling down the hall
- **Certified & Compliant.** 2011/2012 ONC-ATCB compliant & certified as a Complete EHR

LIFE IN THE CLOUD, ALL ABOUT FREEDOM

Putting your practice in the AdvancedMD cloud means you gain freedom to access software and patient data and freedom from IT hassles. More than the efficiencies of a paperless office, you gain a complete set of EHR and practice management features that can all be securely accessed anywhere you need to be—even from home. Our cloud offers higher speeds than traditional software running over wide area networks due to lesser bandwidth requirements. You are able to reduce hardware requirements and costs. There are no licensing, usage or server fees.

- **Ease of Use.** Simple & easy-to-learn software speeds paperless migration, boosts productivity
- **Continuous Updates.** Never worry about hassles & costs of manual software upgrades
- **Data Backup & Security.** Gain peace of mind with automatic & hourly offsite data backup
- **Medical Records Storage.** Offsite storage protected by enterprise-class, banking-grade security
- **Managed Network.** Connectivity to the payer network is easy
- **Anywhere, Anytime Access.** Gain complete agility using any device with Internet Explorer
- **Remote Worker Support.** Work anywhere you have an Internet connection
- **Multi-site Connectivity.** Reduce the hassle of complex networking gear, software & servers
- **Performance Improvement.** Achieve faster clinical & scheduling performance
- **Application Integration.** Easily integrate hundreds of vendors & services using one platform
