

UNIFIED WORKFLOW

FOR EVERY ROLE IN THE PRACTICE

Rhythm is the AdvancedMD all-in-one medical office software master suite that provides unified workflow for every role of the practice. It is a complete cloud platform of smart applications – legendary billing, flexible scheduling, simple charting, accurate reporting and easy-to-use patient relationship management tools.

Rhythm is transformational because all practice information is synchronized and accessible for clinical, business and patient needs. Simply put, with Rhythm

you are able to focus your most important tasks with technology that supports everything you need, anywhere you need to be.

A smart EHR dashboard includes the daily schedule and prioritized task donuts so physicians can easily see work volume and prioritize outstanding items. Patient cards present key clinical summaries at-a-glance, so physicians, nurses and other caregivers can effortlessly assess information and make informed decisions

PRACTICE MANAGEMENT

Industry-leading front office and medical billing software seamlessly passes data to all roles within your practice.

EHR SOFTWARE

Smart clinical apps giving you quick access to patient information from any Apple device and any browser.

PATIENT ENGAGEMENT

Engage your patients healthcare experience online, while capturing patient feedback in real-time.
