

# 10

## Trends Driving Healthcare Automation Your Practice Must Utilize

Medical practices of all sizes are using automation tools to work more efficiently and improve patient satisfaction. From online scheduling to ePayments, these tools allow your patients to enjoy convenient and simplified tasks that don't interrupt their day. Likewise, your patients can complete simple tasks like filling out intake forms from the comfort of their home and save time in your office. Since the pandemic, these tools have continued to drive healthcare automation. Is your practice following these top 10 trends post COVID-19? If not, you—and your patients—are missing out.

Healthcare Continues to Move to the Cloud

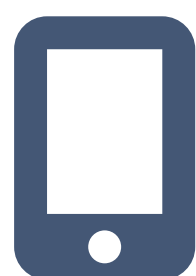

Billing with **Automated** ICD-10 Updates

Adopting High-Tech Patient Engagement Tools

Increasing Cybersecurity Measures

Mobile Healthcare with Unified EHR

Smart EHR Dashboard

Implementing Innovative Applications

Establishing a **Partner Marketplace**

Complete **Interoperability** and Connectivity

Financial Reporting with a **Standard Report Center** and Advanced Reporting & Analytics

Not only will your patients benefit from this healthcare automation, but so will you and your staff. Access patient information 24/7 from any device when you utilize cloud-based software. Your team won't waste time calling for schedule reminders or scanning insurance since everything is handled beforehand.

Your practice will run seamlessly as you can prioritize your tasks with the smart dashboard and interact with other providers for lab results and more. So how can you and your medical staff use these automated tools? **AdvancedMD is the answer.** We provide the best cloud-based medical office software, with

features to meet the needs of all 10 healthcare trends driving automation.

You can upgrade your practice with just one call to AdvancedMD. Improve your patient satisfaction, reduce the workload on your staff, and earn reimbursements faster. It's a win-win-win for you, your healthcare team, and your patients!
