Physical Therapy

Complete suite of smart applications for your physical therapy practice.

We have solutions to automate your workflow, provide exceptional care, engage patients & collect more revenue.

## EHR WORKFLOW & CLINICAL INFORMATION MANAGEMENT

Work should not be work. Our EHR dashboard includes prioritized task donuts and your schedule, conveniently at your fingertips. We have unified our EHR, practice management and patient engagement tools into a complete platform for a remarkably automated practice experience. What makes our platform so unique is the seamless data transfer across all functional areas of your physical therapy clinic.

The clinical benefits are endless
Up-to-date information that is available from anywhere and anytime, reduced double data entry, and all-around faster charting time from physical therapy-specific templates. Most physical therapists on our platform rave about how quickly and simply they can keep up on their work using on our free iPad/iPhone app.

Unified Billing Software.

Productivity features include our eClaims, electronic remittance advice (ERAs), automated insurance verification, denial tracking, collections module with prioritized worklists and hundreds of others. Our billing bundle helps ensure claims are submitted and paid quicker for low A/R balances. We're so confident you'll love the billing and collections features of AdvancedBilling, we offer a written guarantee that you'll achieve at least a 95% first-pass clean claims acceptance rate.

Online Patient Portal.

Our physical therapy features support faster needs resolution. Don't force patients to call your office and sit on hold. Our online portal helps patients spend less time leaving messages, waiting for a callback or trying to schedule office visits. Online messaging, bill-pay, telehealth and appointment features enable patients to ask questions, send requests and schedule office visits with just a few clicks. Faster response time results in faster needs resolution.

Improving Patient Payments.

Online payments is another self-help feature that is unified within our patient portal. Patients can manage electronic or paper statement delivery. They can view and download detailed statements, access payment histories, manage a credit card on file and a payment plan. They can also download credit card payment receipts for tax purposes. Payment options include the total balance, statement balance or any other amount.
