PARTNER SUCCESS PROGRAM

Together, we'll get the job done!

You need a more profitable practice, with less stress — today and tomorrow. We have the relationships and resources to get you there.

SELECT THE RIGHT BILLING PARTNER & PULL IN MORE REVENUE!

If the business of healthcare is challenging your commitment to remaining in private practice, investigate outsourcing your revenue management to a medical business specialist.

Declining revenues and increased operating costs are the bane of many private practices. If you are struggling with hiring and retaining strong billing professionals, tracking and working denied claims in a timely and efficient fashion, capturing patient portion payment at the time of check-out, you should at least investigate what our billing service partners can do for you.

If you are currently using a billing service provider, but are not receiving regular management reports that help the physicians and your office manager stay on top of revenue flow, or you are seeing high monthly write-offs, you should consider having us match you with three billers in our network—companies that understand your specialty.

THE BENEFITS GAINED PUT YOU IN FINANCIAL CONTROL WITH MORE FOCUS ON WHAT MATTERS MOST.

- Our members are part of a national network comprised of more than 300 billing service providers with proven experience and billing expertise
- You achieve 95% or better accepted claims on first pass due to their investment in comprehensive claims scrubbing technology
- Automation tools enable credit card payments to be captured at your front desk and automatically posted to the proper A/R account managed by the billing partner
- Automation tools enable the billing service to manage patient payment plans, which further improves your revenue capture
- You receive automation tools that increase overall staff productivity (Scheduler, eEligibility, ePrescribing and EHR), while improving integration to the billing platform for faster, more accurate claims processing
- Automated reporting tools enable the billing service to keep you up to date on your financial health
- You tap into experienced talent to support your account because billing is what they focus on.
- You can adhere to industry best practices as defined in the MGMA book, entitled The Physicians Billing Process
- You become a technology-enabled practice, capable of staying current with regulations. (ANSI 5010 and ICD-10)
