

# PRACTICE VIRTUALLY. TREAT MORE, SPEND LESS.

GROW YOUR PRACTICE WITH CONVENIENT,  
COST-SAVING TELEMEDICINE CONSULTS.

Geography doesn't have to be a barrier to quality healthcare or practice growth. Telemedicine is our convenient, cost-effective solution for your housebound, elderly, and rural patients. Virtual two-way conferencing technology helps you consult with patients who have difficulty traveling or are located far from your practice locations.

In addition to performing patient consultations via video conferencing, telemedicine allows you to securely transmit still images, communicate via our patient portal and remotely monitor patient vital signs.

Telemedicine also integrates with your practice management and EHR software, so you can still schedule and consult within a single system. Seamless integration keeps your overhead low, allowing you to expand your practice's reach without extending your wallet.

## **INTEGRATED**

Easily connect with your practice management and EHR systems to provide a more unified front office and clinical workflow.

## **EFFICIENT**

Video conferencing technology allows you to treat and care for more patients without added overhead.

## **PRODUCTIVE**

Virtual home visits provide faster time to care, diagnosis, and treatment for improved health outcomes and patient satisfaction with less costly treatments.

# SUPPORT WORKFLOW & IMPROVE PRACTICE OUTCOMES.

## APPOINTMENT DASHBOARD

See all your telemedicine appointments in one dashboard calendar, then launch and end your virtual healthcare sessions with a single click. It's that easy.

## ONE-CLICK SCHEDULING

From your practice management or EHR system, you can instantly schedule a telemedicine appointment, see when the patient arrives, and start the session.

## CONFERENCE INTERFACE

Provide quality care with face-to-face conversations that bring the personal attention of an office visit to the virtual healthcare experience.

## PATIENT PORTAL

A convenient, intuitive online portal helps your patients schedule appointments, request prescription renewals, pay bills, and even chat with you in real time.

## SECURE TRANSMISSION

Easily capture high-resolution video conference screenshots, transmit images, and save them to patient files with secure, HIPAA-compliant technology.
