

# TELEMEDICINE SOFTWARE FOR EXCEPTIONAL CARE BEYOND YOUR OFFICE.

CARE WITHOUT BOUNDARIES & TREAT MORE  
PEOPLE WITHOUT TAKING ON MORE OVERHEAD.

At the core of patient expectation is a great telemedicine (telehealth) experience. As one of the pioneers of telehealth solutions, we have designed the easiest to use and easiest to administer telemedicine software system for private practice healthcare. Based on customer feedback, we created our solution to be ideal not only for improving workflow, but for creating a stellar patient experience for patients of all ages and technical skill level.

Your complete AdvancedMD bundle subscription includes all our product tiers in a unified bundle: scheduling, EHR, billing, and of course patient engagement with telehealth. Everything works together harmoniously. You gain a simpler solution. Our telemedicine is unified with our practice management and EHR so you get all these virtual healthcare features without needing more software.

Don't let geography be a barrier to delivering quality healthcare. Our telemedicine platform is the convenient, cost-effective solution for your housebound, elderly, or rural patients. Virtual two-way conferencing technology helps you consult with patients who have difficulty traveling or are located far from your practice locations.

# EXPLORE TELEMEDICINE SOFTWARE FEATURES.

## FULLY UNIFIED EXPERIENCE

You and patients gain a fully unified experience within the familiar AdvancedMD workflow and all our features.

## PROVIDER LIST MANAGEMENT

Provider list view shows all telehealth appointments by provider and location from a central management screen.

## SELF-SERVICE SCHEDULING

Patients can access your schedule and make appointments online based on your real-time schedule availability.

## APPOINTMENT REMINDERS

Reminders are sent automatically in the patient's preferred language with session details and an evergreen link.

## BROWSER-BASED EXPERIENCE

Simply click a link on a smartphone, tablet, or computer to access your session. Nothing to install or download.

## ADD ADDITIONAL MEMBERS

During a live session add additional participants like a family member or staff to triage patients more easily.

## SCREENSHARE & COLLABORATE

Let providers screenshare with participants to better engage and share important health information and milestones.

## POST-VISIT SURVEYS

Surveys are sent automatically to gather insights and encourage patients to post feedback to your social media sites.

## APPOINTMENT DASHBOARD

Easily manage all telemedicine appointments. Remind patients, launch, and end virtual sessions with a single click.

## ONE-CLICK EHR SCHEDULING

From our EHR, schedule a telemedicine appointment, send link, see patient arrive, start session, and add staff.
