

TRANSFORM METRICS INTO INFORMED BUSINESS DECISIONS.

TIMELY, ACCURATE & INSIGHTFUL REPORTING
OPTIMIZES FINANCIAL PERFORMANCE.

According to a recent Thomson Reuters study, the medical industry wastes \$700 billion each year on administrative inefficiency, lack of coordination, unnecessary care, and provider errors. The key to avoiding this kind of waste is adopting business intelligence tools that help identify issues quickly and effectively. Our sophisticated, easy-to-use reporting and analytics suite takes your practice data and produces detailed reports for quicker problem resolution and strategic decision making.

Gain a 360-degree view of your practice's financial health with smart dashboards, accurate

real-time data, easy-to-read interactive tools, and up-to-date month/year comparisons. Take advantage of big data technology, analytics, and business intelligence to uncover hidden revenue opportunities. You'll be able to see the easiest, most strategic ways to improve your practice.

And it's easy to use. With an intuitive drag-and-drop interface, custom reports can be run in seconds. Charts and graphs can be easily created to add visual support for presentation purposes. Start your remarkably easy journey to insightful reporting right now.

FAST

In seconds, get the right data and understand that data through smart dashboards and elegant, meaningful reports.

INTUITIVE

Easily build reports with customizable features and drag-and-drop functionality that saves time and resources.

POWERFUL

Gain insight into any aspect of your financial performance: payer mix, A/R trends, CPT reporting, productivity trending, reimbursement analysis, referring providers and more.

SOPHISTICATED & ROBUST FEATURES PRODUCE MEANINGFUL BUSINESS INTELLIGENCE.

DASHBOARD

A consolidated view gives an easy reference of your overall financial health. You can easily see all your key financial metrics such as charges, encounters, top carriers, aging accounts and A/R trending.

ON-SCREEN TIPS

Nearly every page offers one or more helpful hints to aid in report design and creation with customizable filters and report properties.

PROVIDER PRODUCTIVITY REPORT

Easily identify top E&M codes, RVUs, encounters, and procedures in order to better evaluate productivity and individual provider value towards your overall revenue.

OPEN DATABASE CONNECTIVITY (ODBC)

Our suite features ODBC, an open standard application programming interface (API), so the reporting and analytics tools connect seamlessly to your existing databases and software solutions.

DRAG & DROP TOOLS

Create custom reports with supporting graphs and charts on the fly with drag-and-drop ease. Easily add filters for carrier, diagnosis, CPT, patient details, and more. Any report can be exported to Excel and PDF.

COLLECTIONS RATIO SUMMARY

Calculate your collections ratio month over month for the past 12 months. See charges, payments, adjustments, as well as gross and net collection ratios. Evaluate how much you are collecting versus what you are billing.

ON-SCREEN TIPS

Nearly every page offers one or more helpful hints to aid you in creating reports for the first time, adding filters and customizing report properties.
