

PAPER SAVED. ERRORS MINIMIZED. SATISFACTION ENSURED.

DITCH THE PAPER FOR A FASTER, SAFER
PRESCRIPTION METHOD.

When you adopt a paperless prescription workflow, you achieve higher levels of security, organization, and productivity. You can quickly review medication and allergy lists, import medication histories, choose medications based on patient formulary, link multiple pharmacies to a single patient, link one or more pharmacies to an individual patient at the point of care by pharmacy type, and confirm and sign prescriptions.

But ePrescribing isn't just about saving time—it's also about safety and security. Accessing patient data across the continuum of care helps you catch potential medication conflicts, assess the efficacy of previous medications, and ensure that your patient isn't allergic to what you're prescribing.

Security is maintained as electronic prescriptions transmit in a federally mandated digital format (NCPDP) through the entire transmission process.

Medication price transparency (MPT) provides real-time, patient-specific prescription pricing and therapeutic alternatives. You can perform a formulary lookup and get a list of qualifying medications with copays based on the patient's insurance coverage. This helps find medication options that are affordable for the patient, ultimately helping them adhere to medication therapy. Together, MPT, formulary verification, and electronic submission create the ideal integrated ecosystem to simplify prescription decisions for every patient, every time.

SECURE

Prescriptions are submitted and kept in a federally mandated digital format (NCPDP) through the entire transmission process.

SAFE

Get access to insurance formularies and receive alerts for drug-to-drug, drug-to-allergy, and drug-to-disease interactions.

AUTOMATED

Prescriptions automatically renew at any US pharmacy, reducing follow-up calls while improving patient convenience and compliance.

REDUCE HEALTHCARE COSTS WHILE IMPROVING PATIENT SATISFACTION & HEALTH OUTCOMES.

EPCS

Robust security measures, increased visibility, and detailed reporting protect your patients and your practice when prescribing controlled substances.

ALLERGY LISTS

Track and review complete lists of patient allergies, along with current medications and history, to make more informed decisions and improve treatment outcomes.

PATIENT-SPECIFIC INFO

Access therapy options and brand alternatives available for any patient budget while supporting treatment adherence and practice compliance.

MEDICATION HISTORY

Patient medication histories across the entire continuum of care can be quickly imported and reviewed, giving you the full picture before prescribing.

MOBILE ACCESS

With use of our mobile app, you can stay connected and easily manage prescription requests from anywhere at any time for the ultimate convenience.

PHARMACY LINKING

Patients can be linked to preferred pharmacies with just one click while pharmacies can be easily searched by type, including retail and mail order.

MEDICATION PRICE TRANSPARENCY

Medication price transparency (MPT) gives you automatically updated patient benefits and formulary information with copay details for 70% of US covered lives.
